

Cyber Secure Processing for Resilient & Survivable Systems (CyPRSS)

Software Products and SMS Support

CyPRSS Software

CyPRSS provides a repeatable approach for secure boot, extension of trust, and continuous remote attestation for multiple distributed ‘agnostic’ Roots of Trust (RoT), extending trust through a cascading network configuration. CyPRSS extends the traditional RoT model to incorporate multiple RoTs from multiple system components or sources forming a lattice-based access network above typical OS and Network trust.

Obligations of Licensee

Northrop Grumman requires that Licensee will: (i) keep secure all copies of the Licensed Software (including the archival copies) and records pertaining to Licensee’s Use of the Licensed Software in accordance with best computing practices; (ii) not request, permit, or authorize anyone other than Northrop Grumman to provide any maintenance or support services for the Licensed Software; (iii) cooperate fully with Northrop Grumman’s personnel in the diagnosis of any error or defect in the Licensed Software; and (iv) make available to Northrop Grumman, free of charge, all information, facilities, and services reasonably required by Northrop Grumman to perform software maintenance services (SMS).

Product Pricing

Prices listed below are effective through December 31, 2024. Licenses are offered and priced on a single major end item (MEI) basis, with bulk purchase discounts. Each license (i.e., each copy of the Software) may only be installed on a single MEI. A single license cannot be used concurrently by multiple MEIs. The bulk discounted prices are only for use within a single program.

Initial Software Maintenance Services (SMS)

Software Maintenance Services (SMS) will be provided to a Licensee by Northrop Grumman without additional charge for the initial twelve (12) month period following receipt of license Fees (“Initial Support Term”). SMS are provided to Licensee only if an initial purchase of the Licensed Software has been made.

Additional SMS

Beyond the initial support term, no SMS, implementation support, or other support services or technical assistance will be provided to Licensee. If Licensee desires to continue SMS, then the parties may enter into negotiations for a separate software maintenance agreement (“Support Agreement”) to provide SMS.

Base Product License		
1 Base License	\$250,000	Base license required on all purchases
Additional Product License(s)		
1 unit	\$30,000	
10 units	\$270,000	10% savings per unit
25 units	\$600,000	20% savings per unit
50 units	\$1,050,000	30% savings per unit
Evaluation	\$0	Max of 5 licenses, negotiated period
Base Software Maintenance & Support (SMS) License		
1 SMS Base License	\$75,000	Base SMS license required on all purchases
Annual SMS License(s)		
1 unit	\$8,500	
10 units	\$76,500	10% savings per unit
25 units	\$170,000	20% savings per unit
50 units	\$297,500	30% savings per unit
