

COLLECTIVE JOINT TRAINING

Training Today for
Tomorrow's Threats

The United States faces new and emerging threats across the globe. To prepare the U.S. military for these challenges, Northrop Grumman's **Collective Joint Training** program orchestrates the full spectrum of Joint Force training operations required to execute global exercises that train warfighters for any threat, anywhere.

The backbone of these exercises is a Northrop Grumman team of highly skilled experts who operate a suite of advanced training tools in support of the Joint Staff's Joint Training, Exercise and Evaluation Program. With our proven pedigree and history in distributing live, virtual, and constructive (LVC) training, we provide the Joint Staff and U.S. Combatant Commands with highly realistic multi-domain operation environments and compelling training scenarios for simulating joint training exercises around the world.

WHAT WE DO

- Deliver a continuum of individual, staff and collective joint training
- Coordinate event planning, design, preparation and execution of combatant command and service joint training exercises
- Manage dozens of global exercises with our suite of advanced LVC simulation tools, providing warfighters with complex and realistic multi-domain operation (MDO) environments
- Arrange logistics, Modeling and Simulation management, scenario, database builds, distributed learning, media replication, courseware development, educational development, technical requirements, concept integration, analysis and assessment, information management/

knowledge management and capability development

- Provide cybersecurity, information assurance and lightning-fast network connectivity

CJT PRIORITIES

- Support the Chairman of the Joint Chiefs of Staff, combatant commanders and service joint training exercises
- Manage Combatant Command and Joint Staff training
- Empower tomorrow's senior leaders
- Implement Joint Force development initiatives in exercises and wargames
- Manage the Joint Lessons Learned Program
- Support integration of the Joint Training Tool into exercise planning and execution processes across the joint training enterprise
- Provide expertise to facilitate development of the Joint Warfighting Concept, a strategic vision for how the U.S. military will operate and fight as an integrated joint team

CJT MILESTONES

- Nearly **30,000** U.S. and Allied Warfighters Trained Annually
- **30** Years Supporting Joint Training

SINCE 2019

- **254** Exercises
- **8** Globally Integrated Exercises
- **3** Globally Integrated Wargames
- **44** Capstone, Keystone and Pinnacle Events
- **1,270** Joint Event Life Cycle (JELC) Events
- **5,886** Contract Deliverables
