

DMON

Distributed Mission Operations Network Next-Gen Training Anywhere, Any Time

With global threats on the rise, Air Force pilots must be able to train at a moment's notice anywhere in the world. Northrop Grumman's Distributed Mission Operations Network (DMON) provides the lightning-fast network backbone needed to connect advanced live platforms, such as fifth-gen aircraft, and disparate simulators across the world together into one blended constructive environment.

For 25 years, Northrop Grumman has supported the Air Force's Combat Air Forces Distributed Mission Operations office with cutting-edge live, virtual and constructive training capabilities. We link together U.S. and allied forces, allowing them to covertly train for advanced scenarios with a variety of fourth- and fifth-gen aircraft.

WHAT WE DO

- Northrop Grumman delivers a fully functioning, collective training solution that is scalable and cyber secure. We deliver the virtual-constructive backbone for LVC leadership and DMON is a core enabler for the U.S. Air Force to achieve its LVC vision of worldwide training.
- We provide distributed training to airmen across the globe in all domains, from daily team training to large scale exercises that provide a safe and realistic environment for instruction at a lower cost than employing live assets.
- DMON, one of Northrop Grumman's flagship training products, delivers secure connectivity and lightning-fast network interoperability among disparate simulator platforms across the globe, allowing U.S. and allied airmen to train together in high-fidelity virtual environments.
- Our platform allows for enhanced warfighter proficiency with high-end tactics, techniques and procedures development.
- Our proven system connects legacy and emerging simulators and could serve as a foundational platform to support future requirements and capabilities such as the Joint Simulation Environment.
- DMON supports 19 unique air platforms across 65 geographical regions and more than 120 sites worldwide. We are expanding DMON's global presence, with particular focus on the United Kingdom and Japan.

BY THE NUMBERS

- 25 Years supporting the U.S. Air Force
- 1,800 Events a year (average)
- 16,000 Training hours a year (average)
- 120+ Sites
