

NEXT-GENERATION ARMY TRAINING

Propelling Technology Into the Future

The U.S. Army faces a myriad of existing and emerging threats across the globe. To prepare for them, the service relies on Northrop Grumman's suite of advanced constructive training analysis tools. Through our proven history, innovation and collaboration with the U.S. military, we orchestrate advanced training exercises grounded in Army doctrine, tactics, techniques and procedures giving our soldiers the most realistic scenarios to train with.

WHAT WE DO

- Orchestrate collective training Warfighter Exercises for Army Service Component Commands, Corps, and active and reserve Divisions and Functional/Multi-Functional Brigades on behalf of the Army's Mission Command Training Program (MCTP).
- Construct large-scale combat operation scenarios offering realistic, relevant and immersive training environments.
- Provide credentialed, trained and certified personnel to enable, sustain and control constructive collective training anywhere in the world.
- Supply highly trained, certified, experienced and competitive free-thinking, near-peer opposing forces to challenge soldiers and prepare them for any scenario in any domain.
- Our Northrop Grumman-developed analytical tools, capable of expansive drill-down capabilities into specific warfighting functions and simulations, facilitate effective and timely after-action reviews and take-home products that provide leaders with a comprehensive view of exercise performance and future training opportunities.

MCTP SUPPORT PRIORITIES

- Provide complex, advanced and multi-domain exercise scenarios in support of readiness and training priorities for U.S. Army Forces Command and U.S. Army Training and Doctrine Command.
- Leverage mission partner environment networks and solutions that strengthen joint and allied partnerships and participation.
- Enable all aspects of multi-domain training environments that integrate live, virtual and constructive elements to enhance realism, rigor and immersion, as well as facilitate multi-echelon training from Brigade through Theater Army while reducing costs.
- With a laser focus on performance, we harness the power of our people, processes and tools to create operational efficiencies and deliver solutions that solve the Army's toughest training problems.
