From: Edward Hannon, Project Director  
Date: Thursday, October 3, 2024  
Subject: Soil and Groundwater Remediation Updates  
10/24 Virtual Community Meeting Scheduled for 7 p.m.

---

Northrop Grumman is providing this progress report on our activities in support of our soil thermal remediation work at the Bethpage Community Park and ongoing groundwater remediation activities.

### **Phase 2 Thermal Remedy Underway**

Phase 2 of the thermal treatment remedy for Park soils is operational as of September 4, 2024. As we have mentioned during our previous community meetings, in 2023, we completed treating the VOCs in soil in the ballfield in the Phase 1 location. That effort met (and exceeded) the State's requirements for the cleanup.

### **October 24 Virtual Community Update**

We invite you to attend our next virtual community update at 7 p.m. on October 24, 2024.

We will provide an update on the Park soil thermal remedy progress, our ongoing groundwater treatment system operations, completion of our phase 1 and our upcoming phase 2 east-southeast investigative work, and our routine groundwater monitoring program activities.

We remain committed to protecting the health and well-being of the community and to continuing our partnership with NYSDEC and other government regulators and stakeholders to address environmental conditions in the area.

In anticipation of our meeting on October 24, if you have questions about this project, please contact Dianne Baumert-Moyik at (516) 754-2645 or [Dianne.baumert-moyik@ngc.com](mailto:Dianne.baumert-moyik@ngc.com).

We will issue a follow-up meeting invite with the specific call-in information next week.

Additional project information can be found by visiting [www.northropgrumman.com/bethpage](http://www.northropgrumman.com/bethpage). Thank you.
