

# AC-208 Eliminator™

Armed Caravan  
Multi-Role Platform

## Capable

The AC-208 Eliminator™ offers an advanced, cost-effective reconnaissance and ground attack capability including operational over-watch. It builds on Northrop Grumman's certified Eliminator™ Armed Caravan.

- High resolution mission system providing decision advantage with real time detection, localization and targeting of threats, with exportable MPUx data.
- Secure, multi-network transmission of prosecuted EO/IR imagery, SIGINT interrogation and ground forces triangulation
- Interactive console with high-quality video, communications and data link management, including Line-of-sight (LOS) and Beyond-Line-of-Sight (BLOS) audio and visual communications
- Common Mission Operator Station with advanced COTS workstation for near-real time and post mission data analysis
- Robust day/night intelligence, surveillance, and reconnaissance (ISR) solution
- Advanced navigation controls and processing for high accuracy target positioning
- Advanced mission management system with multi-munition experience
- Northrop Grumman's exportable advanced targeting and fire control system

- Reconfigurable weapons system with Missile Warning and countermeasures system
- Warning and countermeasures system
- Rapidly removable SIGINT system for additional mission capability and enhanced targeting

## Specifications

### HIGH RESOLUTION MISSION CONSOLE

- High Resolution 15" EO/IR Sensor, Datalinks, Data Recorders and Pilot Displays
- Command and Control Capable from Mission Console

### PLATFORM CAPABILITIES

- Integrated Fire Control
- Autonomous Aircraft Protection
- Flight Data & Voice Recorders
- Ballistic Monitoring
- Night Vision Capable
- Concurrent Cargo Lift
- Secure Datalinks
- SIGINT

### WEAPONS EMPLOYED

- AGM-114 K/M/P HELLFIRE™
- 2.75" Rockets (Unguided and APKWS II)
- Northrop Grumman's Hatchet

## Proven

The AC-208 Eliminator™ is the only deployed and operationally proven multi-role light attack aircraft currently on the market.

- Armed over-watch and strike capability certified by the FAA and US DoD
- Battle-tested, rapid, self-deployable and flexible design: 25,000+ combat hours logged with over 3,500 weapons fired

## Operational

- Sustained logistic support - AC-208 aircraft have been fielded since 2006 using Northrop Grumman's Contract Logistic Support (CLS) and Field Service Reps (FSRs)
- Enhanced mission system operator and aircraft maintenance training with host country organic sustainment capability
- Multi-Mission – AC-208 Eliminator™ is currently operating simultaneous missions, including strike, cargo lift, ISR and SIGINT
