Travis Garriss

Vice President
Chief Information and Digital Officer
Northrop Grumman Corporation

Travis Garriss is vice president and chief information and digital officer for Northrop Grumman, a technology company focused on global security and human discovery. In this role, he leads all aspects of the company's information technology (IT), digital transformation, and data intelligence strategy.

Before joining Northrop Grumman in 2025, Garriss served as vice president and chief information officer (CIO) for BAE Systems, Inc. There, he was responsible for implementing a comprehensive IT vision and leveraging technology to drive value and achieve company strategy.

Previously, Garriss spent more than a decade with Honeywell, where he established global IT architecture, enforced compliance standards, and directed network and application operations for multiple business segments. Most recently, he served as CIO and vice president of User and Functional Enablement, delivering modern infrastructure, software and services globally.

Prior to joining Honeywell in 2007, Garriss led the integration of hundreds of websites and applications at DHL into a universal security and application service delivery architecture to improve productivity, after running a consulting firm specializing in Internet services and network security for public service, communications, and other clients.

He holds a bachelor's degree from Excelsior College.

Northrop Grumman is a leading global aerospace and defense technology company. Our pioneering solutions equip our customers with the capabilities they need to connect and protect the world, and push the boundaries of human exploration across the universe. Driven by a shared purpose to solve our customers' toughest problems, our employees define possible every day.
