Northrop Grumman Demonstrates Critical Technologies at World Defense Show.

RIYAD, Saudi Arabia. – Feb. 4, 2024 – Northrop Grumman Corporation (NYSE: NOC) will showcase its advanced defense technologies, including air defense systems, multi-mode radars, munitions, and countermeasures, at the World Defense Show from Feb. 4 to 8.

- *Northrop Grumman’s advanced capabilities, from radars to munitions, are in service with the United States and deliver the proven mission advantage needed to protect national and regional security.*
- *Our integrated air and missile defense systems revolutionize how allied forces interoperate across all domains, delivering advanced warfighter capabilities.*
- *Northrop Grumman’s AN/TPS-78 multi-mode radar is designed for survivability and mobility and in service with the U.S. Air Force and allied forces across the globe.*
- *Our infrared countermeasure systems defend aircrews by detecting, tracking and jamming incoming infrared threats. They automatically counter advanced infrared missile systems using high-intensity lasers.*

Experts:

Ala’a Abu Soud, Middle East regional executive, Northrop Grumman: “Our company is committed to supporting partners and allies in the Kingdom of Saudi Arabia and the Middle East by providing access to mission-critical technologies.”

“We’re working closely with local industry to build local defense industrial capabilities. We’re committed to regional production and technology transfer, because both are essential to long-term regional security.”

“Northrop Grumman is investing in the right portfolio of capabilities to combat emerging threats and the local partnerships essential for mission success.”
