

# Warheads

As the only company to offer integrated fuze and warhead design, Northrop Grumman's Missile Products Business Unit innovates effective, high performance payload solutions.

### Features

Northrop Grumman tackles each set of fuze and payload mission requirements as a standalone project to design and develop a completely tailored solution to match the mission.

Lethality Enhanced Ordnance (LEO)

Warhead Digital Optimizer

Advanced Production Facilities

Model Based Systems Engineering

Insensitive Munitions Compliance

Arena and Sled Testing

### Missions We Support

- Air missiles
- Hypersonics
- Bomb production
- Surface missiles
- Maritime
- Unmanned aerial systems
- Undersea applications

### In Production

- 5,000+ per year

### Our Advanced Weapons Edge

Dedicated production facility with focused supply chain support to provide customers on-time, on-cost and high performance warheads

### Benefits

- Latest Insensitive Munitions (IM) features
- Custom low quantity solutions
- Reliable large scale production
