

Memo

To: Bethpage Residents
From: Edward Hannon, Project Director
Date: Tuesday, November 30, 2021; 3:30 p.m.
Subject: RW-21 Piping installation (December 1 and 2)
Community update meeting tomorrow night at 7 p.m.
Sheridan Avenue closure continues
Central Avenue (at Hickey Blvd. crossing) underway

Northrop Grumman is providing this progress report to you on the installation of piping to support the RW-21 groundwater treatment system project. Our contractors continue to conduct road work on town- and county-owned streets along the piping route.

Our schedule through December 2 is as follows:

Wednesday, December 1 and Thursday, December 2: We will continue backfilling on Sheridan Avenue. We continue several days of utility locate test pitting work on Central Avenue (at the Hickey Blvd./Sheridan Avenue crossing). As this work progresses, there will be intermittent lane closures on Central Avenue as we move across the work zone. Work will be completed by 4:30 p.m. All work is weather dependent.

ORANGE LINE IS CURRENT WORK ZONE; Black line is completed work

Street closures and vehicle movement during work hours: As we work to complete the piping installation and restoration on Sheridan Avenue north to Central Avenue, Sheridan Avenue remains closed entirely (except to residents who live there). We want to thank everyone on Sheridan Avenue for moving your vehicles during work hours.

Drivers who use Central Avenue regularly are advised to use alternative routes to avoid traffic delays at the Hickey Blvd/Sheridan Avenue crossings while this work is in progress.

Apollo Circle and Sunny Lane Traffic Control Advisory: Residents living at Apollo Circle and Sunny Lane Senior Citizen complexes should expect to see similar traffic control signs at the intersection of Hickey Blvd. and Central Blvd. that were present during the piping installation along Hickey Blvd./Grumman Road East in the spring of 2020.

Updates to Bethpage School District Walkers/Bus Routes: We continue to routinely update Stacey Popkin from the Bethpage School District Transportation office on our project.

Pavement restoration on Emma Street: In the next few weeks, we will repair areas of Emma Street where the paving restoration has now settled.

Work vehicles moving in and out of our staging area: You may also observe our equipment vehicles entering and exiting our staging areas off Broadway south of Arthur Avenue and the east side of the Town Municipal Lot B-2 (Seaman Avenue).

National Grid work in the area: National Grid has ongoing residential gas installation efforts in the vicinity of our project work. National Grid's work (and their own traffic control efforts) is unrelated to the Northrop Grumman pipeline installation and concerns about their work should be addressed to National Grid directly.

As a reminder, we will host our next virtual update tomorrow at 7 p.m.
