Subject: Groundwater sampling in Town of Oyster Bay Parking Lot on Stewart Avenue
Ongoing groundwater sampling and groundwater level measurement program

Northrop Grumman is providing this progress report to you on our activities in support of the RW-21 groundwater treatment system project and other associated environmental activities.

Our contractors will conduct groundwater sampling activities on behalf of the New York State Department of Environmental Conservation on Wednesday, September 14 through Friday, September 16 at the Town of Oyster Bay parking lot (Stewart Avenue and Benkert Street). The crews will work from 7:30 a.m. to 4:30 p.m.

The work zone is reflected in the image below. We will have at least four parking spaces unavailable during that work period. We will place barriers around the work zone on Tuesday evening.

We are continuing our routine groundwater sampling and groundwater level measuring program at various locations through the month of September. Residents near our work zones receive specific notices in advance of our work on their street.

If you have any questions, please contact Dianne Baumert-Moyik at (516) 754-2645 or Dianne.baumert-moyik@ngc.com. Our project information can be found by visiting www.northropgrumman.com/bethpage. Thank you.
