

Memo

To: Bethpage Residents
From: Edward Hannon, Project Director
Date: Tuesday, April 19, 2022 at 8:30 a.m.
Subject: RW-21 project update
Central Avenue paving this Wednesday and Thursday
Vandalism last week in well vault area on utility corridor
Groundwater treatment system building construction continues
Routine groundwater sampling underway

Northrop Grumman is providing this progress report to you on our activities in support of the RW-21 groundwater treatment system project.

Roadway paving on Central Avenue this week

Northrop Grumman's contractors will conduct asphalt milling on Central Avenue this Wednesday and will repave and restripe the roadway curb-to-curb within our pipeline work zone on Thursday. We remind all drivers to be aware of our work crews and to drive with caution. We will have traffic controls in place.

Vandalism in our well vault work area on the utility corridor

Last Thursday, unknown individuals vandalized our RW-22 well vault work area on the utility corridor. We reported the incident to the Nassau County Police Department, and they are investigating. If you or your family observed anything unusual, please contact the 8th Precinct.

Groundwater treatment system construction continues

We continue to make solid progress on the construction of the groundwater treatment system.

Routine groundwater sampling underway

Our routine groundwater sampling program continues throughout the month of April at various locations.

If you have any questions, please contact Dianne Baumert-Moyik at (516) 754-2645 or Dianne.baumert-moyik@ngc.com. Our project information can be found by visiting www.northropgrumman.com/bethpage. Thank you.
