

RW-21 Well Vault Installation to Commence: Parking Notification

On February 24, 2020, Northrop Grumman’s contractors began their preparation to install a New York State Department of Environmental Conservation-approved well vault in this Town of Oyster Bay LIRR parking lot.

Beginning Monday, March 2, 2020, the project work area will extend to Seaman Avenue. During each work period noted by the red segments, municipal parking will not be available in that area. Work hours are 7 a.m. to 5 p.m. Monday through Friday (excluding Town holidays). We expect to complete this phase of the project by close of business March 31.

Periodically, our contractors will also need to move heavy equipment into and out of the parking lot. They will cordon off the south side of Seaman Avenue at the entrance to allow equipment to move in and out safely. We appreciate your cooperation.
