

## Memo

**To:** Bethpage Residents  
**From:** Edward Hannon, Project Director  
**Date:** Friday, July 9, 2021; 5 PM  
**Subject:** Upcoming RW-21 Piping installation preparation (July 12 and 13)

---

Northrop Grumman is providing this progress report to you on the installation of piping to support the RW-21 groundwater treatment system project. Our contractors continue to conduct road preparation on town-owned streets along the piping route. We thank you for your continued support.

As of this evening, we have completed utility location work on all town-owned streets (Sophia Street from the utility corridor headed west to North Herman Avenue, North Herman Avenue heading north to Emma Street, Emma Street, S. Pershing, Brenner, and Sheridan); as well as the mechanical equipment installation at Well Vault RW-22 (on the utility corridor). The saw cut limit markings are complete on Sophia Street, North Herman Avenue, and Emma Street to prepare the road for excavation and piping installation.

### **Our schedule is as follows:**

**Monday, July 12:** We will begin cutting road asphalt on Sophia Street (from the utility corridor west to North Herman Avenue). Work crews will saw cut a single line down the street from east to west on Sophia Street and a second line down the street from west to east on Sophia Street. We will do the same on North Herman Avenue (the east side of the street heading north to William Street) with a single cut heading north to William Street and second cut heading south back to Sophia Street. Work crews will need between 15-30 minutes of time to score the asphalt in front of each residential driveway. Work will be completed by 4:30 p.m.

**Tuesday, July 13:** We will continue cutting road asphalt on North Herman Avenue (starting north of William Street on the west side of North Herman Avenue). Work crews will saw cut a single line on the street (north of William) up to Central Avenue, followed by a single line heading south from Central down to William Street. Work crews will need between 15-30 minutes of time to score the asphalt in front of each residential driveway. Work will be completed by 4:30 p.m.

As a reminder, we ask all vehicles to temporarily relocate from the work locations above during the respective work day. We appreciate everyone's cooperation. Traffic controls and road work signs will remain on Sophia Street running west from the utility corridor to North Herman Avenue; and east side of North Herman Avenue heading north to William Street and then crossing over to the west side of North Herman Avenue to Central Avenue. We will cover traffic control signs west of Stewart until we resume work west of Stewart.

We will conduct work at Broadway and William Street next Tuesday, July 13, 2021, to install the mechanical equipment at our RW-20 well, and you may also observe our contractors conducting routine monitoring well maintenance on Central Avenue, Harrison Avenue and at two locations on Route 107 from July 12-15, 2021.

Please continue to reach out to **Dianne Baumert-Moyik via mobile at (516) 754-2645** or via email at [dianne.baumert-moyik@ngc.com](mailto:dianne.baumert-moyik@ngc.com) if you have any questions. For all details, visit [www.northropgrumman.com/bethpage](http://www.northropgrumman.com/bethpage). Please note all work is weather dependent. We appreciate your continued support. Thank you.
